-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Receipt is acknowledged of Applicants' Information Disclosure Statement filed on 12/12/03 and 08/06/04. Claims 1-10 are pending in the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 6, 7, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dresdner et al (US 5,357,636).

Applicants' claims are directed toward a glove comprising: polyvinyl chloride polymers; a strong oxidant such as chlorine dioxide; sodium chlorite; and a catalyst such as titanium dioxide.

Dresdner teaches a thin walled glove comprised of: polyvinyl chloride polymers (col. 23, line 38-39); a strong oxidant such as chlorine dioxide (col. 22, line 49); sodium chlorite (col. 31, line 26); and a catalyst such as a metal oxide (col. 56, line 36). Additionally, the glove can be coated with the chlorine dioxide (col. 1, line 15), in which the release of chlorine dioxide by exposure to light would be an inherent characteristic of the oxidant.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dresdner et al (cited supra) in view of Wellinghoff et al (WO 00/69775).

As discussed above, Dresdner teaches a thin walled glove comprised of: polyvinyl chloride polymers (col. 23, line 38-39); a strong oxidant such as chlorine dioxide (col. 22, line 49); sodium chlorite (col. 31, line 26); and a catalyst such as a metal oxide (col. 56, line 36). Additionally the glove can be coated with the chlorine dioxide (col. 1, line 15).

Dresdner does not teach that chlorine dioxide is released by exposure to light or specifically teach using a catalyst such as titanium oxide. However, chlorine dioxide released by exposure to light with a catalyst such as titanium oxide is known in the prior art. For example, Wellinghoff teaches a composition that released chlorine dioxide when exposed to light (pg. 19, Example 1) in the presence of titanium oxide (pg. 19, line 8).

It would have been obvious to the person of ordinary skill in the art at the time the invention was made to incorporate Wellinghoff's teaching of photoactivated chlorine dioxide and titanium oxide into Dresdner's glove composition. The person of ordinary

Art Unit: 1618

skill in the art would have been motivated to make those modifications and reasonably would have expected success because Dresdner's invention previously used chlorine dioxide and a metal oxide catalyst.

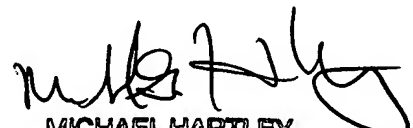

Telephonic Inquiries

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jake M. Vu whose telephone number is (571) 272-8148. The examiner can normally be reached on Mon-Fri 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hartley can be reached on (571) 272-0616. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
